

CAT ROYALE

Classy and Unique
Cat's Choice

A SPACE TOTALLY
EXCLUSIVE

For Your Cat

The toilet bowls, which are specially designed for your cat to be comfortable during the most sensitive toilet times, are perfectly compatible with the Geoclay cat litter produced in high quality standards.

The melted polypropylene raw material is colored using a paint that is highly compatible with both human and environmental health, and the appropriate form is then obtained during the production phase of toilet bowls without compromising Geoclay quality standards. After the final controls in the quality department, it is packed in ten pieces and stacked.

20 cm x 35 cm x 50 cm

It keeps liquid from reaching the floor thanks to the granule distribution that was

specifically optimized for

Cat Royale

Introducing our premium cat litter, which we provide for classy, prestigious, and elegant cats.

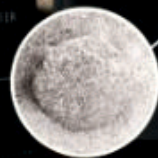

Cat Royale, the premium cat litter offered with 5 different options: **Lavender, Baby Powder, Marseille Soap, Natural and Activated Carbon**, gets its strength from the white bentonite that comes from our licensed quarries.

With granule sizes ranging from 0.7 to 2.5 mm, it is designed to guarantee the lowest dust, maximum lump quality, and water absorption capacity in the product content. One of the top priorities of our quality unit is the quality of the essences used in the products and the selection of these essences in line with the standards suitable for the environment, human health, and animal health. One of the product's most notable advantages is its capacity to capture odors.

With the market statistics it has attained both domestically and internationally, Cat Royale, which we provide to the market as a luxury product, continues to demonstrate its success day by day.
